The Rise and Fall of Software Recipes

Darius Blasband

CEO, Raincode

April 28th, 2017, 11:30-12:30

Room D002, Campus di Ingegneria, Dalmine

Software recipes are meant to implement **transitive intelligence**: they have seen many successful applications from **healthcare** to cooking, from **piloting an aircraft** to **identifying an insect**.

However, they hopelessly fail when applied to **software engineering**.

On his first talk at University of Bergamo, the author of "The Rise and Fall of Software Recipes", Darius Blasband, will elaborate on downsides of current software engineering practices and reflect on the current state of software engineering as an industry.

“ When a project succeeds using Agile methodologies, it is in spite of them. Not thanks to them.

Who is Darius Blasband?

Born in 1965, Darius has a master's degree and a PhD from the Université Libre de Bruxelles. His focus is legacy modernization, articulated around compilers for legacy languages. Darius is the founder and CEO of Raincode (www.raincode.com), main designer and implementer of its core technology, an acclaimed speaker in academic and industrial circles.
